# Why Choose FINLIGHT™

As a product and lighting designer, we supply the products that truly fulfill client needs.

Continuous product development guarantees our customers the best possible lighting solutions.

A Finnish company that helps its customers to focus on their core business.

We believe in long term partnership and continuous, mutual business development instead of quick profit.

## VERSATILE PARTNER IN LED LIGHTING FROM **FUNCTIONAL DESIGNS TO HIGH QUALITY PRODUCTS**

Finlight Group Ltd. has been involved in the revolution of LED lighting since 2009. We offer a wide range of services and high-quality products. Our products are mostly developed in Finland to ensure highest possible quality, versatility and energy efficiency.

You can choose the specific services you need from our wide range of expertise. We offer lighting planning, products according to customer requirements, lighting control solutions and professional installation for the system through our cooperation network. We are very well known to complete our projects with proficiency.

In addition to all this, through us you get certified products that meet all required standards. We have worldwide insurance against unexpected damage to the products so you don't have to worry about possible adversity.

## LED Luminaire Production Process

### 1. NEED

Client has a need with lighting application

### 2. SOLUTION

We communicate with the client and clarify their needs

### 3. PROTOTYPE

We make the first prototype and improve the product

### 4. CERTIFICATES

We apply for the required certificates for the luminaire

### 5. PRODUCTION

Production starts!

## AS A CUSTOMER-ORIENTED ORGANIZATION, **WE MEET THE NEEDS OF OUR CUSTOMERS**

We take pride in our customer oriented approach for every single project. We gather initial data carefully when starting a new project to make sure that the provided solution will become as suited for the client as possible.

Our aim is to create long-term customer relations for the mutual benefits. We want to know our client, so we can offer them the best service possible. When client knows us, they know that they will receive quality service with every project.

LED technology advances rapidly and so does our products. Our R&D team makes sure that we only use the best components available in the LED market. The products are always inspected by our highly skilled personnel before releasing them to the market. We keep up with different trends to make sure our product design pleases the eye and at the same time ensures safe usage and heat conduction.

## REDUCE LIGHTING COSTS BY IMPROVING WORK EFFICIENCY

LED lighting is a big factor improving port and terminal area safety. For handling equipment operators LED lighting sources offers improved perception of surrounding areas, reduced glare irritation and operator fatigue in low light conditions.

In addition to all the operating benefits, LED lighting in ports and terminals has a major impact on energy savings and reduced maintenance cost. The return of investment can be realised in a relatively short timeframe by using Finlight™ LED lighting.
